FULL-STACK | BACK-END | PHP | LARAVEL | VUE.JS | MYSQL

PROFESSIONAL PROFILE

Full Stack Developer with extensive experience building scalable web applications with PHP, Laravel, Vue.js and modern frontend frameworks.
Experienced in leading development teams, making technical decisions and contributing to solution architecture. I have worked on high-impact projects, including cadastral lookup systems for public institutions and ERP implementations.
I stand out for my ability to learn independently, my teamwork and my focus on code quality and continuous improvement.

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, Java
Frontend: HTML5, CSS3, JavaScript, TypeScript, Vue.js, Angular, React, jQuery, Astro, Tailwind CSS, Bootstrap
Databases: MySQL, PostgreSQL, MariaDB, SQL Server
Testing and quality: PHPUnit, Jasmine, Karma
Tools: Git, GitHub, Docker, Composer, npm, Vercel
APIs and integrations: REST APIs, token authentication, payment gateways (Culqi)
Methodologies: Scrum, Kanban
Other: Full Stack Development, Software Architecture, System Optimization

WORK EXPERIENCE

XCrivas Comunicaciones
Full Stack Developer
January 2019 - Present | Remote

- Development of complete web applications using Laravel, Vue.js, Angular and React.
- Design and implementation of scalable systems, integrating frontend and backend.
- Took part in completing a previously unfinished ERP system, improving its stability and functionality.
- Implemented improvements in performance, maintainability and code quality.
- Contributed to architecture decisions and the resolution of complex technical problems.
